

Westinghouse

80 AFUE

High Efficiency Oil Furnaces

Engineered for Quality

- More than just better indoor comfort; we want you to feel comfortable investing in a product that will perform when you need it most. Each Westinghouse furnace is checked approximately 234 times during the manufacturing process then run-tested to check operation performance. In the final analysis, computer-automated testing is performed to capture operation data for future reference should your dealer ever need it.
- Westinghouse furnaces are built with proven components to provide safe, clean and reliable comfort year-round. Our heavy-gauge aluminized steel heat exchanger provides long life and offers a limited lifetime warranty. Ask your dealer for details.

High Boy Model Shown

When a furnace is truly built to exacting standards of quality and durability, the manufacturer's confidence shows in its warranty. At Westinghouse we offer a

10-year warranty on all parts and a 10-year quality pledge at no extra cost. With our

10-year quality pledge, we will replace the entire unit should the heat exchanger fail in the first 10 years. To

learn more about our product warranties, ask your Westinghouse dealer, or visit us on the web at www.westinghousevac.com for details.

When choosing your furnace, look not only at the product, but also the service and support provided by your dealer. Your Westinghouse dealer can help you select the right furnace for your home and keep it in top operating condition.

So for home comfort year after year, trust the Westinghouse brand.

Fully insulated cabinet keeps unit cool to the touch. Cabinet insulation also shields operation sound making this furnace one of the quietest available today. Silicone-protective polyurethane coating resists scratching and prevents rusting to keep your furnace looking new for years to come. Controls and burner are completely enclosed for safety. Multi-firing rates for wide range of applications. Oil burner is designed for quiet and efficient economical performance. Beckett® burners are known for consistent quality and reliability. Thermally-protected blower motor with three-speed direct drive is designed for heavy-duty operation. Blower motor is permanently lubricated and resilient mounted for added durability.

What do you look for when choosing an oil furnace? Most likely, you're looking for quality, dependability, energy-efficiency, value and comfort - all from a brand with an excellent reputation. We've built our reputation on providing the highest quality products and the best possible service and support. You'll enjoy all of these benefits, and more. After all - You can be sure... if it's Westinghouse.

First let's talk about efficiency. It's usually one of the first questions customers ask. Essentially, oil furnace efficiency is measured in AFUE ratings. That stands for Annual Fuel Utilization Efficiency. And, the AFUE rating equals the percent efficiency the unit delivers. The higher the percentage the more efficient the unit.

Our 80 AFUE oil furnace delivers a minimum of 80% efficient heat. Compare that to an older furnace that may deliver only 50-60% efficiency. The savings on your monthly energy bills can really add up over the life of your oil furnace. Your Westinghouse dealer can give you more information based on your local energy rates.
