

**EASY TO SERVICE**

**EASY TO SELL**

Nortek Global HVAC's panelized jackets are the right combination of serviceability and sleekness. Homeowners are going to love the look of the unit next to their home and servicers will love just how easy it is to work with – an all-around win-win. Our split-system jackets were designed based on tons of contractor feedback: a system that was durable, attractive, easy to service and easy to install.

## INTRODUCING THE NEXT GENERATION SPLIT SYSTEM

### **SIMPLIFYING SERVICE CALLS**

The smaller size of the panels and rigid corner posts make panel removal simple. Just take out a few screws to gain access to the coil. Clean the coil and service the unit without disrupting the top pan.

### **THE FOOTPRINT FITS**

Systems with the panelized jackets include an all-aluminum coil for increased durability and manageable footprints. Our unit fits in your truck and through a standard gate.

### **ENHANCED DURABILITY**

We've added extra space between the jacket and the coil to prevent rubbing and leaks. As a bonus, this design also promotes quieter operation – a great selling point.

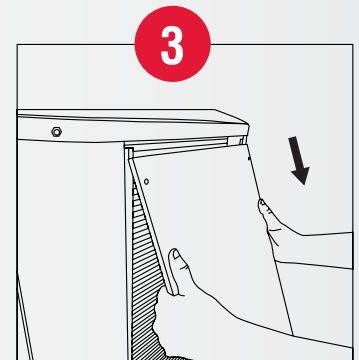

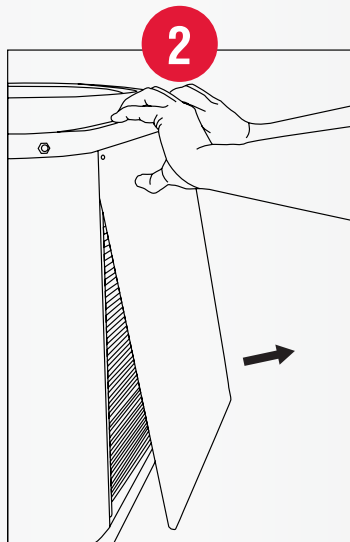

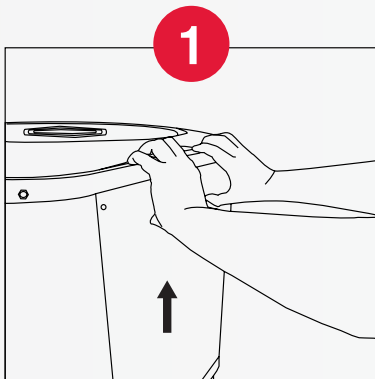

### **INCREASED PRODUCTIVITY**

Installations and maintenance are faster and more efficient. Contractors can service a unit with the panelized jacket design and quickly move on to their next call.

The jacket panels are easy to remove and reinstall.

- 1 Remove the screws at the top of the panel, grasp the jacket pattern style with your thumbs and lift.
- 2 Pull the panel up and tilt the bottom outward.
- 3 Pull the panel out from under the top pan.

To reinstall, repeat these steps in reverse, making sure to seat the bottom of the panel on the lip of the base pan.

## THE NORTEK GLOBAL HVAC LEGACY

Starting with the creation of the first oil burner for home heating and leading up to today's panelized split-system jackets, Nortek Global HVAC has a long history of solving modern-day problems. If there's a better way to do something, we'll find it. Our culture of continual improvement and innovation has led to streamlined manufacturing processes and exceptional product lines. When you choose Nortek Global HVAC, you're choosing quality. Quality backed by dependable products and comprehensive contractor support.
