

NuTone®

2011 Federal Tax Credits

What you need to know.

Signed into law in December 2010, the federal tax credit rewards homeowners who make high-efficiency improvements to their home, including replacement heating and cooling systems. The program allows homeowners to take up to a \$500 total credit on their taxes during 2011. The credit is limited by 10 percent of installed costs.

Here are the details:

- Qualifying product must be placed in service between January 1, 2011, and December 31, 2011.
- Qualifying product must be for taxpayer's principal residence.
- \$500 is the maximum total amount that can be claimed for all products placed in service in 2011.
- Qualifying product must have a Manufacturer Certification Statement, a signed statement from the manufacturer certifying that the product or component qualifies for the tax credit. NuTone provides these Certifications on www.nutonehvac.com. Taxpayers must keep a copy of the certification statement for their records, but do not have to submit a copy with their tax return.
- Homeowners should save their receipts.

FEDERAL TAX CREDIT heating and cooling qualifications.

Below are the minimum requirements for heating and cooling system qualification:

| Heating & Cooling Product | Minimum Performance Requirement | Limit (up to 10% of installed costs) |
|------------------------------------|---------------------------------|---|
| Split-system air conditioners | 16 SEER and 13 EER | \$300 |
| Split-system air-source heat pumps | 15 SEER, 12.5 EER and 8.5 HSPF | \$300 |
| Packaged air conditioners | 14 SEER and 12 EER | \$300 |
| Packaged heat pumps | 14 SEER, 12 EER and 8.0 HSPF | \$300 |
| Gas furnaces | 95% AFUE | \$150 |
| Gas furnaces | Advanced air circulating fan | \$50 |

NuTone qualifying heating and cooling products.
