## iHYBRID PACKAGED SYSTEMS FOR SPACE- SAVING COMFORT

A iHybrid packaged system combines the convenient electric heating and cooling of a heat pump with the energy-efficient gas heat of a furnace, all in one space-saving outdoor unit. Your Maytag heating and cooling dealer can determine if a iHybrid system is the best solution for your home comfort needs.

### Dependability from the inside-out

Below are key features and benefits of the Maytag M120 iHybrid Packaged System up to 15 SEER/80 AFUE/8.0 HSPF.\*\*

- Each unit offers Maytag's 12-year Worry-Free Limited Warranty on parts, and a limited lifetime heat exchanger warranty to give you peace of mind.
- Our Dependability Promise states that your entire unit will be replaced in the first year should your compressor or heat exchanger fail. See your warranty for details.
- Utilizes environmentally friendly Smart Cool 410™ refrigerant.
- Four-stage heating and two-stage cooling provides increased comfort levels.
- Variable-speed blower provides extra quiet operation and improved indoor air quality.
- The galvanized steel cabinet with a protective coating resists corrosion 50% better than comparable units.
- Wire guard coated with earth-friendly epoxy and mesh hail guard protect against damage from yard hazards.
- Indoor and outdoor coils optimize heat transfer and increase durability and reliability.

## Maytag® Comfort

Whom can you trust? With so many brands and products competing for your attention, it can be difficult to know which ones you can trust. For more than a century, families like yours have trusted their homes to Maytag for appliances that are dependable, reliable and worry-free. Now you can entrust your home comfort to Maytag and enjoy peace of mind every day.

\*Efficiency ratings may slightly vary based on size. Ask your Maytag dealer for certified ratings.

\*\*SEER: Seasonal Energy Efficiency Ratio for cooling  
AFUE: Annual Fuel Utilization Efficiency for heating  
HSPF: Heating Seasonal Performance Factor

## DEPEND ON MAYTAG®

Just as you expect from Maytag, your M120 Series iHybrid™ system offers one of the best warranties available in the industry. The 12-year Worry-Free Limited Warranty on parts reflects Maytag's commitment to you. Ask your select Maytag heating and cooling dealer for details, or visit us at [www.maytagvac.com](http://www.maytagvac.com).

## SAVING MONEY AND CONSERVING ENERGY

Your Maytag 15 SEER iHybrid system meets the ENERGY STAR guidelines for product efficiency. ENERGY STAR certification is awarded to products designed to reduce energy consumption and utility costs. Depending on your home and climate, a iHybrid system may handle your heating and cooling needs more efficiently than a separate furnace and air conditioner.

## CREATE TOTAL INDOOR COMFORT

Thermostat

UV Air Treatment System

Zone Control Panel

HRV/ERV

Your outdoor unit is only one part of the comfort system that affects your air quality and energy savings. The following system components from Maytag can improve indoor air quality and help ensure the performance of your packaged unit.

**UV Germicidal Lamps:** Installing an ultraviolet accessory on your packaged unit helps eliminate odor-causing mold and fungus that can develop in an evaporator coil or drain pan.

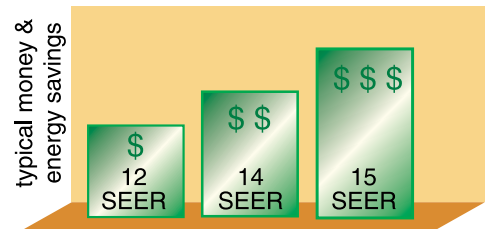

**Programmable Thermostat:** The thermostat automatically adjusts your indoor temperature to accommodate both your home and away schedules, thereby reducing energy costs.

**Zoning Products:** Instead of trying to heat or cool an entire house with one thermostat, living spaces are essentially divided into separate comfort zones. Each zone has its own thermostat to set and monitor the ideal temperature.

**Heat/Energy Recovery Ventilator (HRV/ERV):** Since today's homes are better insulated, harmful pollutants can be trapped inside, resulting in these common health problems: asthma, allergies, headaches and coughs. Ventilators bring fresh air from outside to the inside of your home, diluting pollutants and replacing stale air.

For more information about these and other Maytag products, please consult your select Maytag heating and cooling dealer.

**iHybrid™** The iHybrid system includes both a heat pump that is the primary heating and cooling system and a gas furnace that provides heating when the temperature drops below the heat pump's set point. The two systems share the heating load, and each operates when it is the most cost effective.

Seasonal Energy Efficiency Ratio (SEER)

Your Maytag heating and cooling dealer can offer you the information you need to help you make the best decision for maximum home comfort and energy savings.

This Maytag Large Packaged System features **Smart Cool™<sub>410</sub>** refrigerant, an earth-friendly, non-ozone depleting refrigerant, and is part of our ecoLogic™ family of environmentally friendly products.
