TAPPAN

Tappan Tough™ 10-Year Warranty.

When a humidifier is truly built to exacting standards of quality and durability, the manufacturer's confidence shows in its warranty. At Tappan, we offer an 10-year warranty on all parts if the humidifier is installed and registered with a Tappan matched system. In addition, your Tappan dealer has specific details on warranties and consumer financing programs.

When choosing your humidifier, look not only at the product, but also the service and support provided by your dealer. Tappan dealers receive extensive training in the installation and care of your equipment. That means your Tappan dealer can help you select the right humidifier for your home and keep it in top operating condition.

How Dry Are You?

When you think of dryness, do you picture the arid, wind-whipped sands of the Sahara? Or the cracked, sun-baked earth of Death Valley? It might surprise you to know that there are places in this world that are twice as dry as those. One of the driest places on earth could be your home.

The relative humidity of the Sahara Desert is 25%; Death Valley is 23%. In the winter months, the average heated home can have a relative humidity as low as 13% to 16%.

Humidity for Comfort.

The recommended indoor relative humidity is three to four times the humidity in an average North American home in winter. If you're not reaching those levels in your home, you could be exposing yourself and your family to the physical aggravations of dryness. In fact, doctors often mention dry air as one of the causes for nose, throat, and skin discomfort.

Unhumidified heated air also dries out the wood in your home, shrinking the wood framing around doors and windows. Gaps then occur,

allowing cold air in, making your home less energy efficient.

Dry air also causes wood floors and trim to separate, walls and ceilings to crack; it can harm expensive musical

instruments and electronic equipment such as computers; dryness even weakens the joints of expensive furnishings.

Humidistat.

Tappan Humidifiers are equipped with a manual humidistat to control the humidifier's operation. With proper homeowner adjustment of the humidistat the Tappan Humidifier will provide comfort, preservation, and many other benefits of increased indoor humidification.

Features and Benefits

- Designed to work with your heating & cooling system to make your home more comfortable by eliminating parched, dry air throughout the entire home.
- Delivers comforting humidity to eliminate dry nose & throat, itchy, dry skin - your skin feels smoother, while reducing static electricity.
- Generates moisture to protect and preserve your home & home furnishings against the damaging shrinkage due to dryness.
- You'll feel warmer in the winter resulting in lower energy-saving indoor temperatures.
- Includes full system 10-year warranty when installed and registered with a Tappan furnace or indoor air handler.
