UP TO 14.3 SEER2
COMFORT SYSTEMS

BROAN® HIGH EFFICIENCY UP TO 14.3 SEER2 AIR CONDITIONERS

Broan up to 14.3 SEER2 air conditioners provide you with reliable, year-round comfort.

Your home is the center of your universe. It's where you take care of your family, find solace from the outside world, cultivate your hobbies and bring friends together. While not often top of mind, your air conditioner plays an important role in keeping your home comfortable. Broan understands how valuable your home is, and therefore offers you high quality air conditioners.

This Broan system includes two main components. The outdoor section is an air conditioner. The indoor section is either an air handler or a furnace and indoor coil. A warmer climate location may utilize a heat pump and an air handler; cooler climates may utilize an air conditioner and a furnace. Your contractor will select the appropriate system for your comfort needs.

Depending on your climate, a heat pump may handle your heating and cooling needs more economically than a separate furnace and air conditioner. Your Broan contractor can help you decide which system is best suited to meet your needs.

All Broan air conditioners are built using proven, reliable parts. Each part is examined carefully with our rigorous quality check process. This process ensures your unit is ready to supply years of worry-free performance before it ever leaves our manufacturing facility.

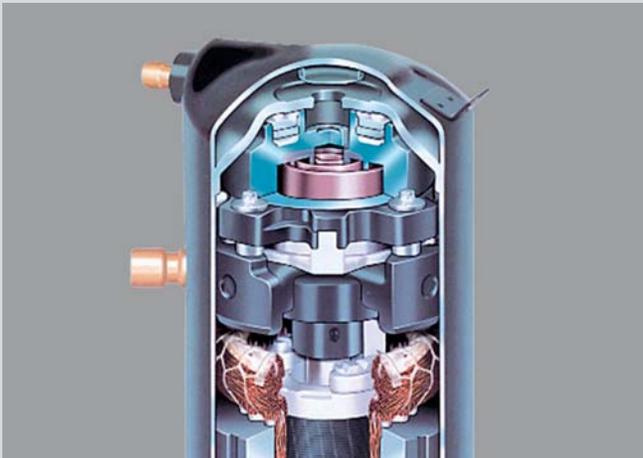

SEER2 ENERGY EFFICIENCY

SEER2 (Seasonal Energy Efficiency Ratio 2) is the new Department of Energy efficiency standard. SEER is the standard measure of efficiency for central air conditioning systems. The higher the SEER, less electricity is required for a air conditioner unit to do its job. The main difference between SEER and SEER2 is the testing conditions for each rating system. The SEER2 testing conditions are meant to give consumers a clearer, more accurate idea of a unit's efficiency.

RELIABLE PERFORMANCE

Broan air conditioners feature the Copeland Scroll® compressor, one of the most reliable compressors available in North America.

ADVANCED TECHNOLOGY

These split-system air conditioners include all-aluminum coils. They feature an innovative design that decreases unit weight and refrigerant requirements, while increasing reliability.

QUIET COMFORT

Broan air conditioners include additional features for extra quiet-performance, such as swept-wing fan blades, sound reducing bases and compressor blankets.

DURABILITY & STYLE

These models are coated with a glossy, powder-paint finish for increased durability and corrosion resistance.

PEACE OF MIND

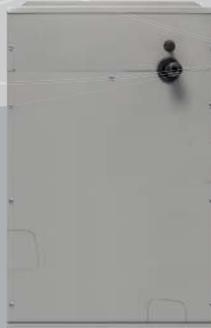

The Broan series of products feature a 10-year limited warranty on parts when the product is registered. Plus, our Quality Pledge states that your entire unit will be replaced if the compressor fails within the first 10 years of purchase, when registered and installed with a Broan matched indoor coil or air handler.

Ask your Broan heating and cooling contractor or visit us at www.broanhvac.net for warranty details.

Product registration required.

BROAN® MULTI-POISE AIR HANDLERS AND INDOOR COILS

INDOOR SECTION

If you replace your air conditioner or heat pump, Broan highly recommends that you also replace the existing coil with a matched Broan coil or air handler.* By doing this, you can ensure maximum efficiency and performance of your comfort system.

Select models are available with upgraded corrosion protection through all-aluminum coils.

DEMAND FLOW TECHNOLOGY

The more you learn about our manufacturing process, the more you'll see why no other heating and cooling manufacturer compares to Broan's product quality — quality made possible through Demand Flow Technology. While other companies test products at random, we use 100% computer-automated testing on every Broan product to eliminate human error in the final analysis of product quality. We are the only heating and cooling manufacturer to be DFT certified.

ENERGY DEFINITION

SEER2 – Seasonal Energy Efficiency Ratio 2

Measures cooling performance on air conditioners, heat pumps and gas/electric packaged products.

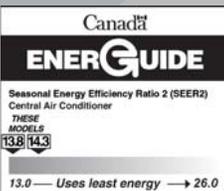

As ratings increase, so does unit efficiency.

BROAN COMFORT SOLUTIONS

A new comfort system, can provide more than energy efficiency. Compatible whole-home indoor solutions address specific needs and can improve your indoor living experience. There are solutions for indoor allergens, humidity control and even room temperature control. Be sure to tell your contractor about any specific comfort issues you would like to resolve.

* A matched indoor coil or air handler is a requirement for coverage under Broan's Quality Pledge.

Proper sizing and installation of equipment is critical to achieve optimal performance. Split system air conditioners and heat pumps must be matched with appropriate coil components to meet ENERGY STAR criteria. Ask your contractor for details or visit www.energystar.gov.
