

Built exclusively  
for manufactured  
homes

**13.4 SEER2  
HIGH-EFFICIENCY  
SMALL PACKAGED  
AIR CONDITIONER PRODUCTS**

## EXCLUSIVELY MADE FOR YOUR MANUFACTURED HOME.

While there are many choices when considering a packaged air conditioner, few are designed and tested specifically for use in manufactured homes.

A Broan 13.4 SEER2 packaged air conditioner offers maximum efficiency and system dependability for your manufactured home.

The more you learn about our manufacturing process, the more you'll see that no other heating and cooling manufacturer compares to Broan's product quality — quality made possible through Demand Flow Technology. While other companies test products at random, we use 100% computer-automated testing on every Broan product to eliminate human error in the final analysis of product quality. We are the only heating and cooling manufacturer to be DFT certified.

You can rely on your Broan expert to make your home more comfortable with digital thermostats and other manufactured home accessories.

It's a comfort to know that Broan is made for your manufactured home, and it's a comfort you can feel.

### WHAT IS SEER2?

SEER2 (Seasonal Energy Efficiency Ratio 2) is the new Department of Energy efficiency standard. SEER is the standard measure of efficiency for central air conditioning systems. The higher the SEER, less electricity is required for a air conditioner unit to do its job. The main difference between SEER and SEER2 is the testing conditions for each rating system. The SEER2 testing conditions are meant to give consumers a clearer, more accurate idea of a unit's efficiency.

### FEATURES & BENEFITS

- Compact footprint and low profile make unit easy to install and transport. Self-contained unit installs on the outside of your manufactured home to maximize indoor living space.
- Includes enhanced all aluminum evaporator and condenser coils that require less refrigerant. They are designed for harsh conditions and reduce unit weight.
- Broan coils are designed to optimize heat transfer and increase durability and reliability.

- Epoxy coated wire coil grille and plastic mesh hail guard protect coil from damage from extreme weather and flying debris.
- Permanently lubricated fixed-speed ECM direct-drive motor provides higher torque and operating speeds for improved airflow capacity and delivers long-lasting reliability and quiet operation.
- State-of-the-art compressors improve efficiency for economical comfort.
- Warranty - Standard one-year limited parts and 5-year limited compressor. Extend your standard warranty to 10-year limited parts by registering at [www.nortekhvaccwarranty.com](http://www.nortekhvaccwarranty.com). Contact your Broan contractor for specific warranty details.
