

Innovation,
dependability and
total comfort

**SINGLE-STAGE
GAS FURNACES
95%, 92.1% AND 80% AFUE**

BREATHE EASY, SAVE BIG

3-YEAR HEATING SAVINGS

95%, 92.1% and 80% AFUE unit vs. 65% AFUE units

Dollar amounts computed at \$.092 ccf, for 2,000 full-load heating hours and a system rated at 60,000 Btuh. Actual savings may vary depending on climate conditions, fuel rates, and patterns of usage according to individual lifestyle.

THE BENEFITS OF AN ECM DIRECT-DRIVE MOTOR.

These Broan gas furnaces include a factory-installed ECM motor for efficient, multi-speed performance. ECM blower motor technology under normal operating conditions ensures constant comfort for the homeowner because the motor will automatically maintain its programmed level of airflow even if there are dynamic changes in static pressure. Better indoor air quality can be achieved quietly and inexpensively with the ECM blower motor because it can be set to run continuously at reduced airflow levels, between heating or cooling cycles. This allows the air to be filtered without excessive drafts and without sacrificing efficiency.

80% AFUE Upflow/Horizontal Single Stage Furnace

1. SmartLite® control board programs igniter to adapt to furnace's heat-up characteristics extending igniter life
2. Multiport, in-shot burner design and location of inducer and air vents assures cleaner, more-efficient combustion
3. Galvanized steel cabinet for added strength and durability
4. Fully insulated cabinet and blower compartment for quieter operation
5. Silicone-polyurethane finish provides superior scratch and corrosion resistance for looks that last
6. Factory-installed ECM fixed-speed direct-drive motor provides higher torque and operating speeds for improved airflow capacity

Smoother motor operation reduces noise and lowers winding temperatures that help to extend bearing-life of the motor

Exceptional Warranty when registered Limited Lifetime Heat Exchanger Warranty/10-Year Limited Parts Warranty/10-year BROAN Quality Pledge

95% AFUE UPFLOW/
HORIZONTAL

95% AFUE DOWNFLOW

95% AFUE EXTRA HIGH EFFICIENCY

- Comfort is nice, but saving money on monthly heating costs is even better. An economical single-stage gas furnace can reduce your energy bills by hundreds of dollars each season when compared to older, inefficient furnaces. A minimum of 95% energy efficiency offers long-term energy savings.

92.1% AFUE UPFLOW/
HORIZONTAL

92.1% AFUE DOWNFLOW

80% AFUE UPFLOW/
HORIZONTAL

80% AFUE DOWNFLOW

92.1% AFUE EXTRA HIGH EFFICIENCY

- A 92.1% efficient furnace will reduce monthly utility bills. This model is designed so in-shot burners, inducer location, air vents and cabinet insulation all work in tandem to produce not only cleaner air, but also quieter operation.

80+% AFUE HIGH EFFICIENCY

- A single-stage furnace provides quiet, dependable operation and is an ideal choice for climates with lower heating requirements.

If installed in SCAQMD only: These furnaces do not meet the SCAQMD Rule 1111 14 ng/J NOx emission limit (14 ng/J), and thus are subject to a mitigation fee of up to \$450. These furnaces are not eligible for the Clean Air Furnace Rebate Program: www.CleanAirFurnaceRebate.com.

ENERGY DEFINITIONS

AFUE – ANNUAL FUEL UTILIZATION EFFICIENCY

It measures the amount of heat actually delivered to your house compared to the amount of fuel that you must supply to the furnace. Thus, a furnace that has an 80% AFUE rating converts 80% of the fuel that you supply to heat – the other 20% is lost out of the chimney. As ratings increase, so does unit efficiency.
