

TECHNICAL SPECIFICATIONS

R6GI Series

Single Packaged
Gas/Electric Units

20 SEER 81% AFUE

Multi-Stage Cool/Two-Stage Heat

2-5 Ton Single-Phase Units

iQ Drive®

The iQ Drive gas/electric packaged system features modulating compressor technology and variable speed indoor and outdoor fan motors. This system is controlled from a two stage cooling and heating thermostat. The system has the capability of adding up to 18% of additional cooling above the rated capacity. The system has dehumidification capabilities from a capable thermostat or duct mounted humidistat. These packaged gas/electrics are ultra-high efficient self-contained heating and cooling units that can be installed on the roof or on a slab. The convertible unit design makes installations simple in all applications. Units are ETL and ETLc listed.

This furnace series is approved and certified by the SCAQM and the SJVAPC Districts in the state of California under each Districts' Mitigation Fee Plan for shipment into and sales in both districts.

For California installations in SCAQMD only: This furnace does not meet the SCAQMD Rule 1111 NOx emission limit (14 ng/J), and thus is subject to a mitigation fee of up to \$450. This furnace is not eligible for the Clean Air Furnace Rebate Program: www.CleanAirFurnaceRebate.com.

FEATURES and BENEFITS

- **iQ Drive:** Inverter driven Samsung rotary compressor provides five capacities in modulating operation from a two stage thermostat.
- **Interface control board:** Two digit LED provides system operation, status and diagnostic troubleshooting information. Utilizes a NORDYNE-patented capacity control algorithm to select the optimum system capacity level. Internal controls monitor system operation to protect the inverter drive and compressor.
- **Cooling operation temperature range: 50 °F to 125 °F**
- **Five Minute Restart Time Delay:** keeps the unit from restarting, eliminating the highest cause for compressor failure.
- **EXV control:** Precise refrigerant superheat control provided by an electronic expansion valve.
- **Suction Accumulator:** Protection from liquid flood back and future compressor failures.
- **Compressor and Component Access:** Designed to make servicing easier for the contractor, hinge access panel is provided to all controls and the compressor.
- **High Efficiency with low Sound Levels:** 20 SEER with sound ratings from 63 to 74 db depending upon operating conditions. Engineered to significantly reduce unwanted noise with compressor sound blanket, variable speed condenser motor and swept-wing fan blade and discharge muffler.
- **High Pressure Switch:** Protects against abnormally high system pressures. Auto-reset feature prevents nuisance service visits.
- **Low Pressure Switch:** Protects against loss of system refrigerant charge.
- **Liquid Line Filter Drier:** Factory installed.
- **Micro-Channel Condenser Coils:** All aluminum coils that provide high corrosion resistance and increased heat transfer.
- **Anteater Copper Tube (Luvata Uniguard) / Aluminum Fin Indoor Coils:** Indoor coils are designed to optimize heat transfer, and increase durability and reliability.
- **Wire Guard Coated with Earth Friendly Epoxy and Plastic Mesh Hail Guard:** A guard that will never rust and protects the units coil from being damaged.
- **Designed using galvanized steel:** with a polyester urethane coat finish. The 950 hour salt spray finish resists corrosion 50% better than comparable units.
- **Heavy-Gauge Full Perimeter Base Rails:** Facilitates forklift handling and curb mounting.
- **Convertible Air Delivery:** Horizontal or downflow to accommodate rooftop or horizontal applications.
- **Corrosion-Resistant Drain Pan:** Quickly drains away evaporator condensate.
- **One Piece Top for Great Fit and Finish, Total Seal:** Well designed, quality construction. Drip edge on top panels whisks away rainwater. Embossed bottom pan keeps blower component compartment dry.
- **SmartLite® Control Board:** Provides extended life to igniters using hot surface ignition technology. Programmed to learn the heat-up characteristics of the igniter, then adapt the ignition time to the characteristics of the furnace so the igniter is energized appropriately.
- **Hot Surface igniter:** Innovative application of an appliance type igniter with a 20 year history of reliability.
- **Energy Efficient Variable Speed ECM Blower:** Advanced motor technology provides 16 field selectable cooling and 8 for heating. Extra quiet and smooth blower on and off cycles, automatically adjusts to different static loads.
